

Soft, Li-ion batteries for electric drive and hybrid vehicles

Saft, the world's leading manufacturer of advanced technology batteries for industry, has been designing and delivering battery solutions for hybrid & electric vehicles for more than 15 years. Electric-driven commercial and industrial vehicles – EV, HEVs, PHEVs – powered by Saft's high-technology lithium-ion battery systems offer a sustainable solution to reduce CO₂ emissions, fuel consumption and noise. Our manufacturing capabilities in Europe and USA make us a partner of choice for global customers.
