

## We propose unique testers for lithium ion battery evaluation

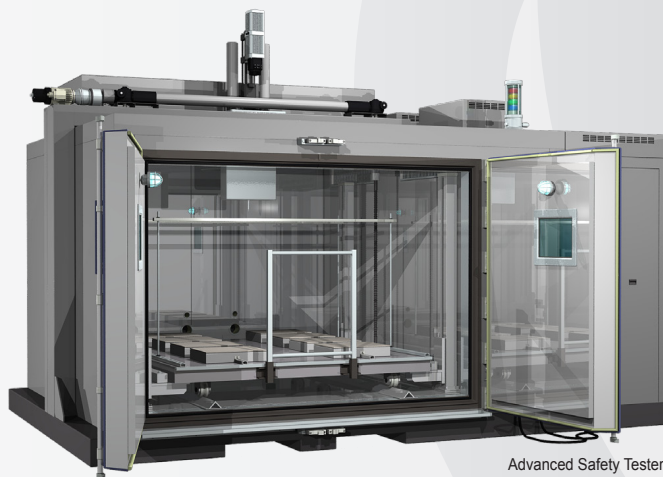

Charge-discharge evaluation system integrated with temperature chamber

### Advanced Battery Tester

Multiple functions including performance testing, durability testing, temperature characteristic testing and impedance evaluation (option) are included in this compact tester. A single tester can flexibly meet a wide variety of testing needs.

Advanced Battery Tester

Advanced Safety Tester

Safety test system meets ECE R100 Rev.2 requirement

### Advanced Safety Tester

Crush tester and External short circuit tester etc. with good human safety and maintenance meet ECE R100 Rev.2 requirement.

Maximum short-circuit current is capable of 24,000A first in the world.
